LETTER OF RECOMMENDATION:

Bruno's Tuckpointing Inc. has provided excellent service to our congregation for over ten years. The quality of their work, their ability to respond quickly to our needs as well as the depth of their understanding of their craft have made them a highly valued supplier as well as a source of advice in caring for our landmark building.

In a major rehabilitation project of our large 1923 Sanctuary building, they worked intensively and extremely cooperatively with our supervising architect in researching the original mortar, in developing specifications for a contemporary product with which to replace the original, and in insuring that the tuckpointing they did matched in texture and style the original distinctive material and application.

Their continuing attention to detail and concern for the integrity of our building makes them a partner in the stewardship of our property. I recommend them highly and without hesitation for any project. Please contact me for more information.
